Single page application, position: Lead JavaScript developer
Architecting and Designing responsive single page application
Design of REST based API's using Ruby on Rails

Red Bull Music Academy redbullmusicacademy.com

Edenspiekermann edenspiekermann.com

Red Bull Jobs jobs.redbull.com

Red Bull Energydrink energydrink.redbull.com

Appendix

Although concentrating on front-end engineering, I'm interested in the whole picture, fascinated of understanding and working with applications the full stack. I strongly believe it is essential to work with agile methodologies, building from the core and iterating on a working product. I'm used working closely with designers and work best in a motivated, talented team with people that get things done and people that I can trust.
